About the Conference

International Conference on Communication, Computing and for Industry 6.0 (C2I6) is an international conference that aims to bring together experts from different domains to engineer a connected ecosystem envisioned by the 6th industrial revolution. The conference is a prominent convention that provides a platform for leading researchers in academia, industry and business leaders to share and exchange the cutting-edge research ideas under one roof, and discuss relevant future directions. C2I6 is committed to promote the industry-academic interaction and bridge the gap between the two by fostering peer-reviewed paper submissions, keynotes, invited talks, panel discussions, project exhibits and a pre-conference workshop. The conference also provides an excellent opportunity for students and researchers to develop their research skills. The conference will recognize one or more papers, demos, posters, and graduate student forum with selective awards.

Objectives

- Promote academic-industry interaction with cross-disciplinary interests contributing to Industry 6.0.
- Provide a platform to share and exchange the cutting-edge research ideas.
- To deliberate current and future challenges in theory and practice.
- Bridge the gap between academia and industry by fostering technical paper submissions, keynotes, invited talks, panel discussions, project exhibits and a pre-conference workshop.
- Offer networking opportunities imperative for academic and industry research and development.
- Provide opportunity for budding student and researchers to develop and enhance their research skills.

Scope

The goal of C2I6 conference is to bring out cutting-edge research works carried out in the leading academic institutions, research labs, and industry contributing to Industry 4.0. To facilitate this the conference hosts presentations of peer-reviewed original technical papers and from academic and industry researchers. Cross-domain contributions from various application areas related directly or indirectly to communication networks, computing, and Industry 4.0 are invited.
